#### 收录于合集

#音响 1 #废物利用 1 #服务器 1

众所周知,因为这个产品的公司破产了,所以这个音响基本上也不能使用了。它的软件和服务器都用不了,那么,为了修复大家手中的音响,实现废物利用节能环保,我们可以自建一个简单的绑定功能的服务器。

#### 首先, 你需要有三个东西

- 1. 有一台Centos系统的服务器,
- (内网、公网都可以,但请不要用国内的公网服务器,不然53端口一般是不允许开放
- 的,请遵纪守法)
  - 2.安装Adgurd Home
  - 3.安装宝塔面板

## 执行以下命令安装Adgurd home

1 curl -sSL https://raw.githubusercontent.com/AdguardTeam/AdGuardHome/maste
 r/scripts/install.sh | sh

```
[root@iz]6c6a56ktx1sifq6flhrZ views]# curl -sSL https://raw.githubusercontent.com/AdguardTeam/AdGuardHome/master/scripts/install.sh | sh starting AdGuard Home installation script 2022/01/20 15:34:00 [info] service: control action: install 2022/01/20 15:34:00 [info] service: started 2022/01/20 15:34:00 [info] service: started 2022/01/20 15:34:00 [info] service: started 2022/01/20 15:34:00 [info] services: started 2022/01/20 15:34:00 [info] and additionally start on boot. There are a few more things that must be configured before you can use it. Click on the link below and follow the Installation Wizard steps to finish setup. Adduard Home is now available at the following addresses: 2022/01/20 15:34:00 [info] do to http://127.00.1:3000 2022/01/20 15:34:00 [info] do to http://127.17.20.184:3000 2022/01/20 15:34:00 [info] service: action install has been done successfully on linux-systemd AdGuard Home is now installed and running you can control the service status with the following commands: sudo/opt/AdGuardHome/AdGuardHome -s start 15:02/2012/01 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: control action: start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: control action: start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: action start has been done successfully on linux-systems (2022/01/20 15:34:42 [info] service: act
```

## 启动

1 /opt/AdGuardHome/AdGuardHome -s start

# 去宝塔面板的安全设置里放行3000和53端口,如图:

访问: http:// 你的IP:3000 会出现以下界面

添加一个重写规则,保存。 aios-home.hivoice.cn 你的ip

接下来是建站部分

在宝塔中新建一个网站,域名处填写aios-home.hivoice.cn:19999,记得选上php环境

进去网站的文件夹新建一个getUserInfo.php文件,填写如图所示的代码

```
1 <?
2 echo '{"status":"0"}';
3 ?>
```

如果以上方案不成功的话,可以把代码直接写在index.php中,然后添加伪静态规则

# (备选的方案)

最后,按照论坛的教程配置你的路由器或者音响本身的DNS实现绑定就可以了,绑定修复以后就可以把你的DNS换回去。

喊一声,小讯小讯,它就不会再提示"未绑定"了,当然还是无法点歌的,别的功能都能用了,你可以把它当一个正常的蓝牙音响。

如果你还有其他什么问题的话,可以直接在公众号的后台反馈下。
